Search NYC DCP's City **Planning Commission Reports** to find previous zoning changes.

NYC DCP's **Zoning Application Portal** is where you can find the status of zoning and land use applications. FYI there's usually a bit of an update delay.

Zola is NYC DCP's map tool for exploring zoning districts. Click on a district to learn more about what that zoning means.

Statements of Community District Needs can be found under the Community Board tab.

NYC DCP's **Community District Profiles** contain relevant data, maps, and resources.

You can explore Census **Data** through the United States Census Bureau's website.

NYU Furman Center's **New York Neighborhood Data Profiles** contains demographic, housing market, land use, and neighborhood services indicators.

NYC DCP's **Population FactFinder** helps you aggregate Census data in NYC-specific ways.

CHEKPEDS manages **NYC Crash Mapper,** which is based on NYPD crash data.

NYC DOT's **Vision Zero View** maps street design and places DOT identified as dangerous.

Transportation Alternatives and MIT's **Spatial Equity NYC** documents inequities in public space and transportation access.

NYHC's **NYC Housing Tracker** tracks housing needs and affordable housing production by borough and NYC Council District.

CoreData.nyc is NYU Furman Center's housing and neighborhoods data hub, which includes city, state, and federal data sources alongside the Furman Center's analysis. The **Subsidized Housing Database** shows property-level information on subsidized housing in NYC, including subsidy types and start and end dates.

NYC DCP's **Equitable Development Data Explorer** is a map tool for exploring lots of housing data, including household economic security, housing affordability and quality, and housing production by Community District.

NYSHCR's **Rent Registration Data Dashboard** visualizes a snapshot of the current submitted status of NYS rent regulated apartments for the past 5 years.

NYC HPD's **Housing and Vacancy Survey** is a citywide survey of housing stock.

JustFix's **Who Owns What** lets you look up which buildings a landlord might own.

NYC DCP's **Housing Production Snapshot, 2024** summarizes findings from NYC

DCP's *Housing Database*, which catalogs housing construction since 2010.

The Comptroller's **NYC Climate Dashboard** tracks progress towards carbon emission reduction goals and neighborhood preparedness for climate change.
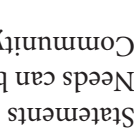

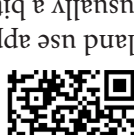

BetaNYC's **NYC Boundaries** tool helps you find all districts from the local to national level and their overlaps.

NYC Open Data contains free public data published by city agencies and partners.

Get involved in grassroots advocacy for a better NYC!

Open New York is working to solve New York's housing crisis by advocating for policy changes to create more housing in every neighborhood!

Transportation Alternatives is pushing for changes in public policy, street design, enforcement, and resource allocation to make safer, more equitable streets!

Riders Alliance is fighting for better, more reliable public transit that is affordable for all!

An Abundance of

NYC DATA
for the
ABUNDANCE AGENDA
